5

ANIMALS

How do I get inside this hole? These horns are too big!

So are mine.

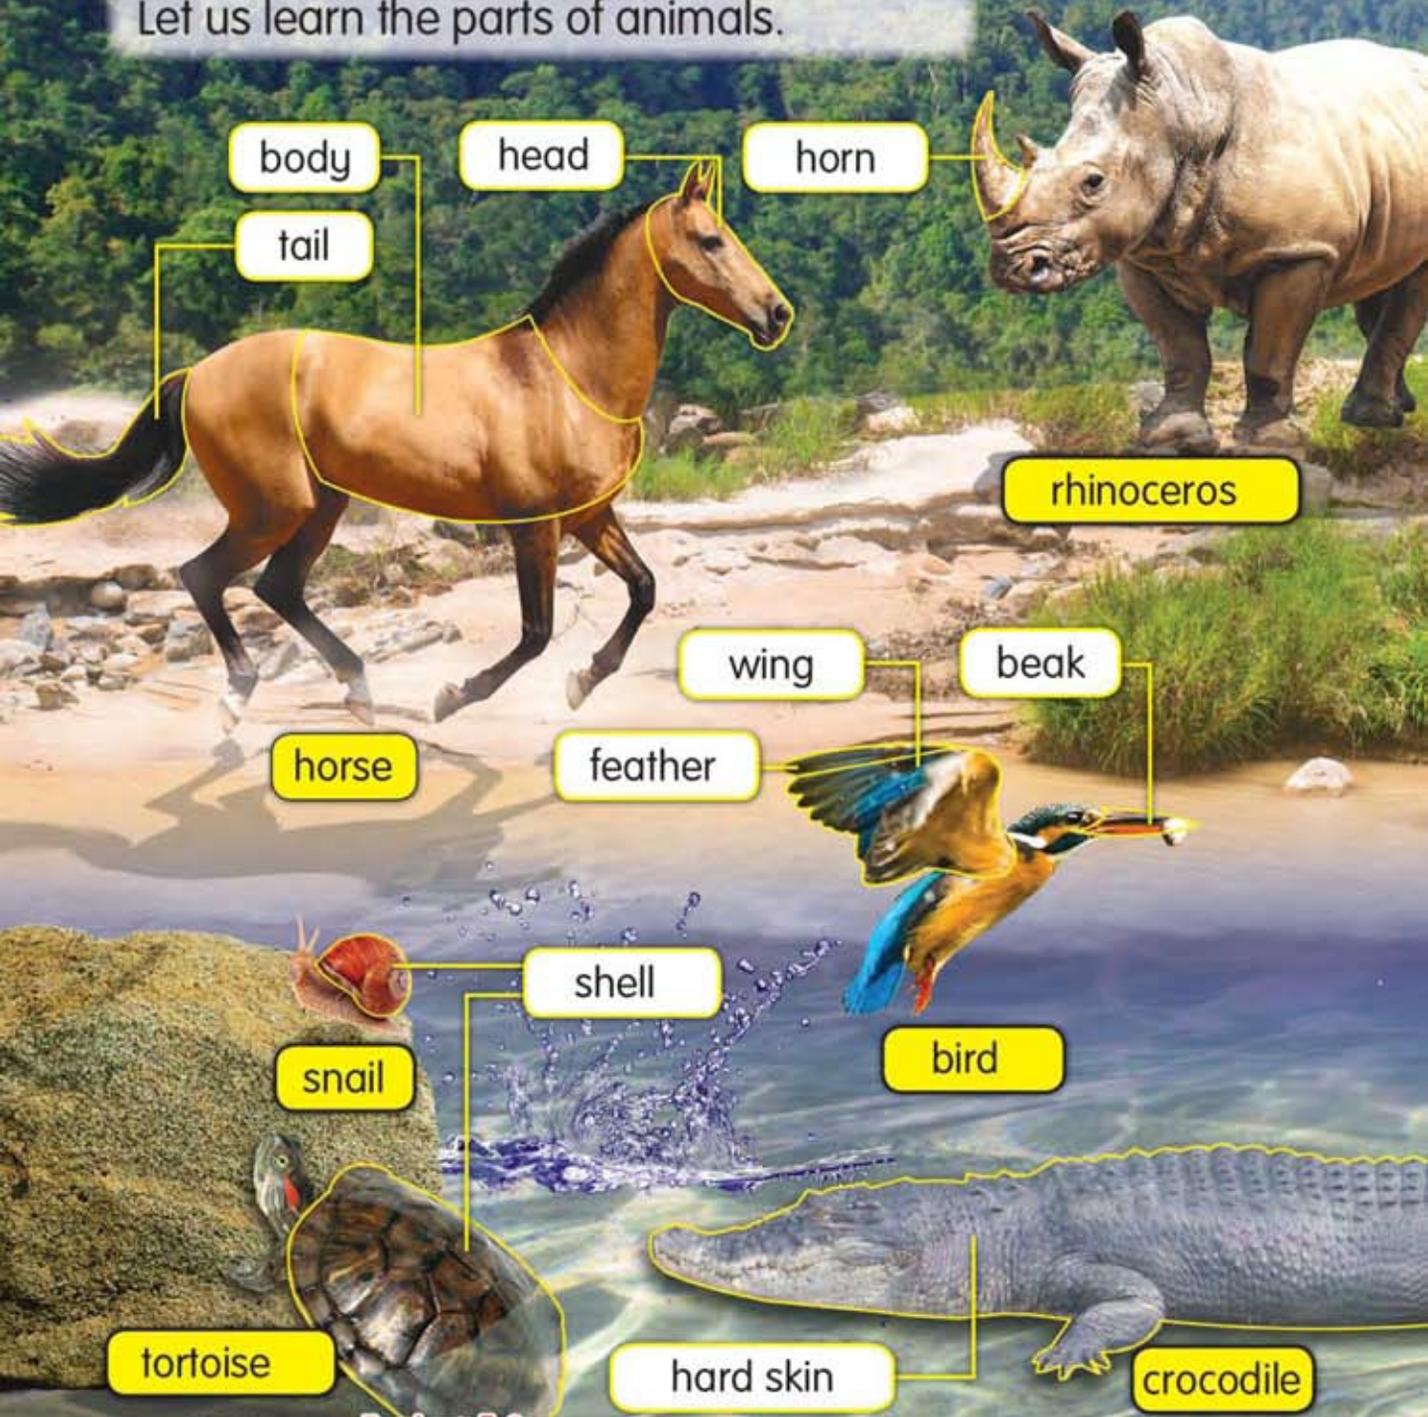

Love
Our Forest

Are the horns suitable for the animals above?
Why?

Parts of Animals

Let us learn the parts of animals.

body

head

horn

tail

rhinoceros

horse

wing

beak

feather

bird

shell

snail

tortoise

hard skin

crocodile

Teacher's Info

Activity Book

Pages:

29, 34

horn

fine hair

deer

goat

wing

antenna

butterfly

dragonfly

duck

webbed feet

frog

fin

scale

fish

APPARATUS AND MATERIALS

6 red paper plates

6 blue paper plates

scissors

glue

double-sided tape

pictures of animals

15 ice cream sticks

string

marker pen

white paper

GROUP ACTIVITY

Steps

- 1** Cut and paste the picture of a bird on a paper plate.

- 2** Paste a piece of paper and write a body part of the bird.

5.1.1
5.1.3
5.1.5

Teacher's Info

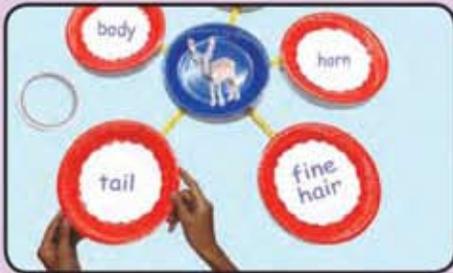

- Prepare pictures of animals before the activity.
- Guide the pupils to stick three ice cream sticks together using double-sided tape.

- 3 Glue the ice cream sticks at the back of the plate (bird picture).

- 4 Paste the plates with the labels of parts of the bird's body onto the ice cream sticks.

- 5 Turn the plate model over. Repeat steps 1 to 4 with a picture of a deer. Paste it at the back of the plate.

- 6 Make a hole on the paper plate and tie it up using a string.

- 7 Hang the mobile.
8 Explain your mobile to the class.

? QUESTION

Compare the differences between the parts of body of a deer and a bird.

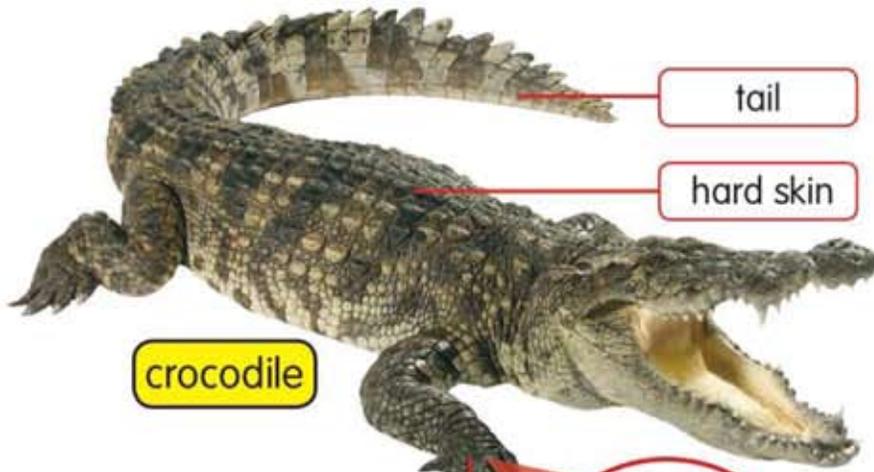

Teacher's Info

- A mobile is a decoration made from wire, etc. that is hung from the ceiling and that has small objects hanging from it which move when the air around them moves.

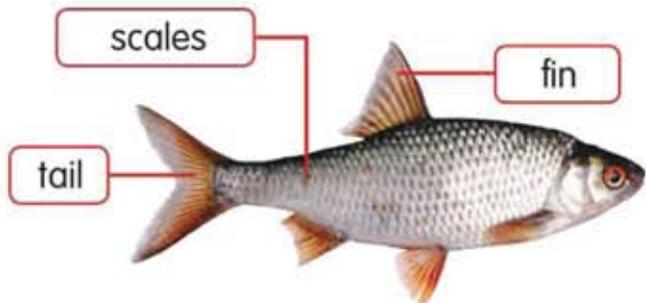

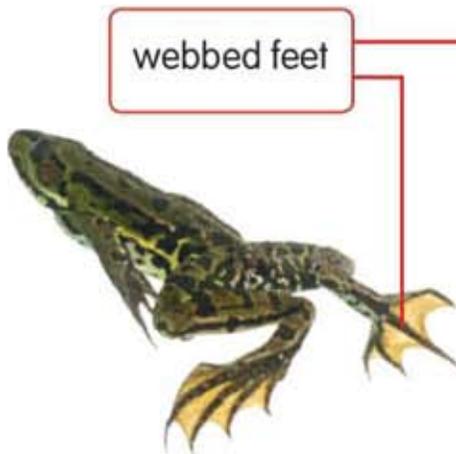

The Importance of Parts of the Body

Every part of an animal has its function.
Body parts are important to the animals.

The hard skin is for self-protection.

The tail is for steering.
The fins and webbed feet are for swimming.

horn

buffalo

horn

rhinoceros

The horns help the animals to protect themselves.

butterfly

wing

bird

The wings help the animals to fly.

Let's Answer

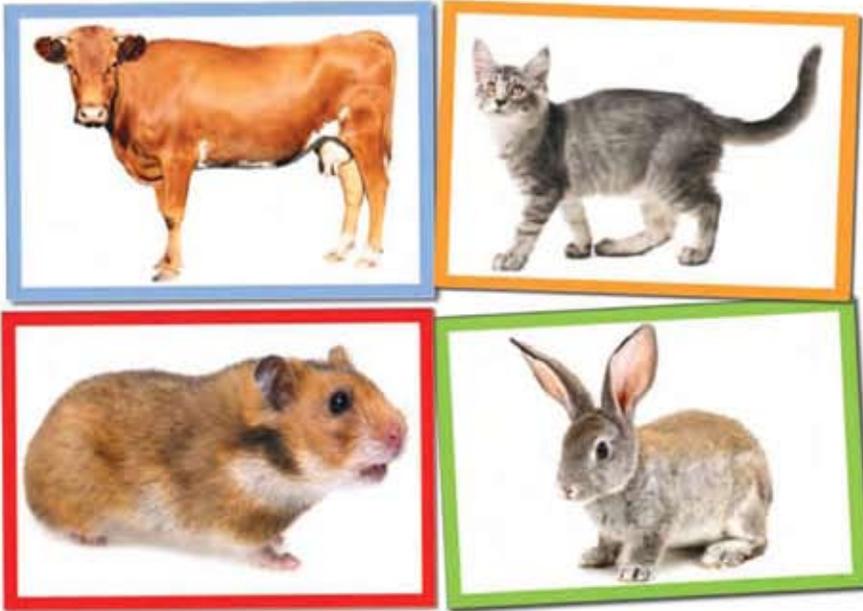

Name parts of the body of the following animals.
State the functions of the parts.

We Are Similar

Hafiz collects several different pictures of animals from magazines.

Hafiz identifies that the cow, cat, hamster and rabbit have fine hair.

Can you explain about parts of the body of the animals above?

There are different animals with similar parts of the body.

Find other similarities in the animals above.

5.1.4

Teacher's Info

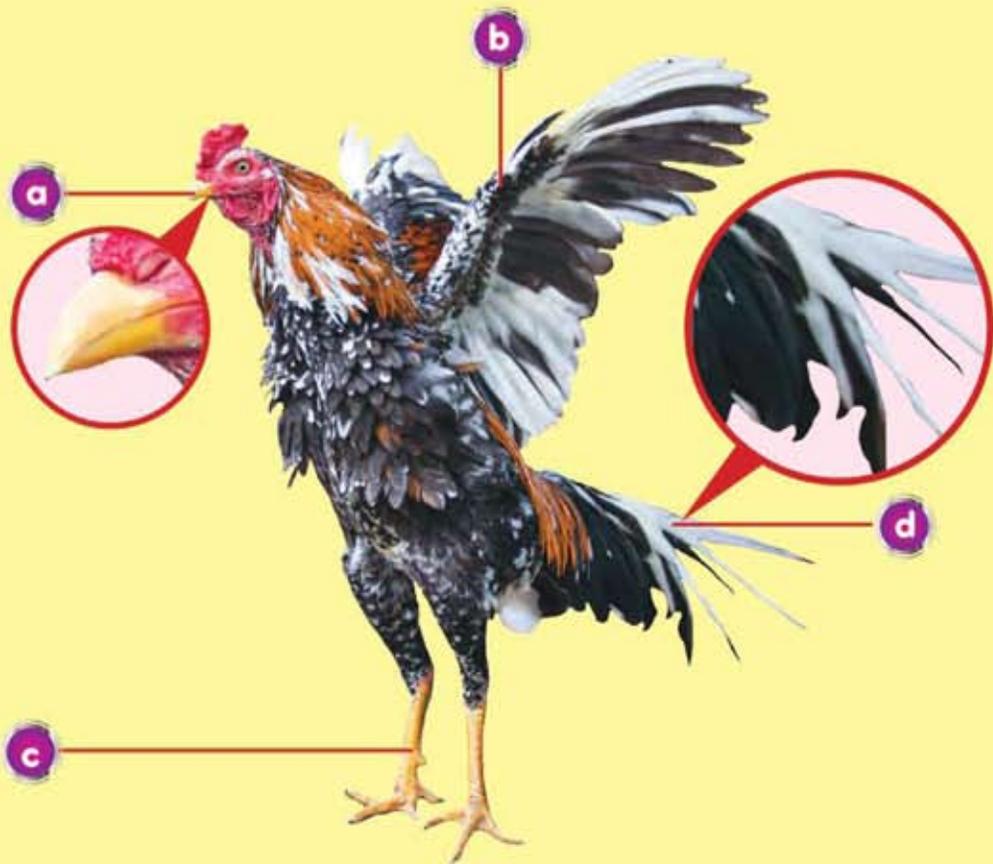

- To generalise is to make a common statement about a subject.

Activity Book
Pages:
32-33

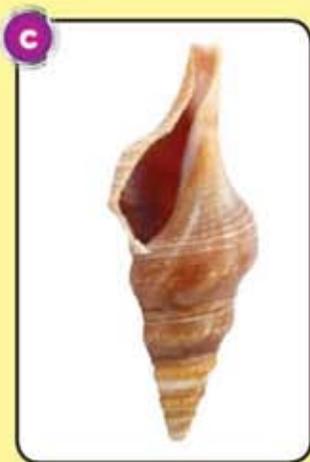

Let's Revise

1. Name the parts of this animal.

2. State the importance of these parts to the animals.

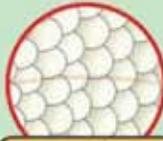

Recall

- Parts of animals:

beak

scales

fin

head

body

tail

wing

horn

horn

shell

antenna

hard skin

fine hair

feather

webbed feet

- Every part of the animals has its importance.
- There are different animals with similar parts.

Science Recreation

Postcard

- Get a piece of hard paper and paste animal pictures on it.
- Label the pictures.
